### Safety Tips

Ensure that all doors are locked at all times and that windows are closed when you are not at home.

Large dogs serve as a deterrent. At least one dog should be trained to sleep inside the house.

If you leave your residence, inform your family/ neighbours of your intended destination, time you expect to return and the route you will be driving, especially if you reside in a rural area.

Ensure that tools such as axes, spades, picks, ladders, etc that can be used in an attack, are locked away when you do not use them.

Vary your daily routine.

You should not be visible in the bedroom from the outside when you are asleep.

Always keep a torch nearby at night and when you use it, ensure that you do not give away your position.

If you are unsure about the security status of your home after returning from work/a visit, eg your dogs do not come to the gate, do not enter your home.

Contact your neighbour to assist you in securing your home.

Identify relatively safe places of refuge, ie: bathroom, toilet or storeroom.

Report suspicious behaviour and information to the SAP.

Do not employ casual workers without a reference.
